Programming: Python, JavaScript, Java, SQL, Node.js, C++

Data Tools: Pandas, NumPy, Matplotlib, PostgreSQL, Firebase, REST APIs

Cloud & DevOps: AWS (EC2, Lambda basics), Google Cloud, Git, Docker (basic)

Web: React, Next.js, HTML/CSS, Express.js

Other: Data visualization, UI/UX collaboration, data cleaning, problem-solving

WORK EXPERIENCE

IT Technician Co-op Student | Kinectrics, Etobicoke, ON

January 2026 - April 2026

- Provided IT support by troubleshooting hardware, software, account access, and workstation issues to help maintain smooth daily operations
- Used ServiceNow, Active Directory, and Lansweeper to document tickets, support user account requests, and track device information accurately
- Assisted with system administration and asset-management tasks while maintaining clear communication, confidentiality, and reliable follow-up with end users

YU-card Services Assistant | York University, Toronto, ON

January 2025 - present

- Delivered front-line support to over 200+ students, staff, and faculty weekly, issuing YU-cards and resolving account-related inquiries with a focus on clarity and accuracy.
- Processed transactions for meal plans, flex deposits, and card replacements achieving 100% accuracy in payment reconciliation during shift-end audits.
- Maintained and updated digital account records, ensuring strict confidentiality and data integrity across student and staff profiles using internal databases.

PERSONAL PROJECTS

[ClickShare](#) | Chrome Extension for Online Fraud Detection

Feb 2025

- An extension that flags phishing websites by integrating the Google Safe API, protecting users from malicious links
- Developed a Flask-based backend to connect with a fine-tuned LLaMA model, which generates contextual safety summary to improve awareness, achieving 98% phishing detection accuracy across 300 tested malicious website
- Implemented Text-to-Speech support using JavaScript and Web Speech API, enhancing accessibility

[TrailSense](#) | Geo-Spatial Trail Search Engine

Aug 2025

- Created a Flask- and JavaScript-based system that recommends hiking trails using semantic search
- Built a semantic video search engine using JavaScript, Python, and Flask that ranks trails by difficulty and vibe
- Integrated Google Maps API for location tagging and dynamic route visualization and AI APIs like TwelveLabs into a cohesive workflow for video analysis and natural language interaction

[TrackNova Intelligence](#) | Inventory Monitoring App

May 2025

- Developed using Next.js, Firebase, and Tailwind CSS to monitor ingredient stocks
- Designed a responsive interface for mobile and desktop users, improving usability and workflow efficiency
- Helps in reducing material waste through smart management and supports UN SDG 12: Responsible Consumption

EXTRA-CURRICULAR ACTIVITIES

Graphic Designer | York University Data Science Club

Sep 2025 – Present

- Designed social media graphics, event banners, and presentation visuals using Figma and Adobe tools
- Worked closely with the communications team to increase engagement through impactful design

Finance Committee Chair - Funding & Grants | Lassonde Student Council

Sep 2024 – Present

- Designed social media graphics, event banners, and presentation visuals using Figma and Adobe tools
- Worked closely with the communications team to increase engagement through impactful design
